WORK EXPERIENCE

2023 – Present

Voi Technology AB

Data Analyst

Stockholm, Sweden

- Extract & Transform: Craft data models from Snowflake's data lake using SQL to meet business needs.
- Implement & Version Control: Integrate SQL into dbt, update documentation, and manage changes via Git and GitHub.
- Collaborate & Merge: Work with senior team members for code reviews on GitHub, refine based on feedback, and merge approved changes to master.

2022 - 2023

Telenor Sverige AB

Business Analyst

Stockholm, Sweden

- Report & Analyze: Crafted business-critical insights on consumer performance and sales quality using SQL, Python, R, Excel, and Power BI.
- Monitor & Collaborate: Oversaw Qlik and other data platforms, working with cross-functional teams to devise and implement data-driven growth strategies.
- Automate & Enhance: Leveraged Python scripting to streamline manual processes, boosting daily operational efficiency and productivity.

2022 – 2022

Aura Cloud

Business Analyst

Stockholm, Sweden

- Visualize & Interpret: Utilized SQL, Excel, and Microsoft Power BI to showcase financial institutions' end-customer credit performance insights.
- Engage & Align: Partnered with stakeholders to define both quantitative and qualitative metrics for end-customer credit performance, propelling strategic business initiatives.

EDUCATION

2010 - 2012

University of Dhaka

MBA, IB (Partial)

- Enhanced my ability to do strategic research of business opportunities and resource allocation.

2003 - 2007

KUET, Bangladesh

BSc, Civil Engineering

- Developed a very healthy network with faculty and fellow students which subsequently became a significant asset in my professional career.

INTERESTS
